MILESTONE HODL TOKEN (MHT) OFFICIAL WHITE PAPER v1.0

ABSTRACT Milestone HODL Token (MHT) is a decentralized protocol on the BNB Smart Chain designed to incentivize long-term holding through automated rewards triggered by market capitalization performance.

I. CORE PROTOCOL The "Milestone Engine" is a Smart-Vault containing 50% of the total supply. Unlike traditional reflection tokens, MHT rewards are performance-based.

- **Threshold:** Every $10,000,000 Market Cap gain.
- **Verification:** Real-time data provided by Chainlink Oracle.
- **Distribution:** 5% of the Vault is released (70% to Holders / 30% to Liquidity).

II. TOKENOMICS

- **Ticker:** MHT
- **Total Supply:** 1,000,000,000
- **Transaction Tax (5%):**
  - 2% Marketing & Development
  - 2% Auto-Liquidity
  - 1% Burn (Deflationary)

III. SECURITY STANDARDS

- **Liquidity Lock:** LP tokens are burned at launch.
- **Anti-Whale:** Maximum transaction size capped at 1% of total supply.
- **Fair Launch:** No private pre-seed, ensuring equal opportunity for all investors.

IV. CONCLUSION MHT creates a symbiotic relationship between market growth and holder wealth. It is the first "Proof-of-Performance" reward token.
